

Martin Automatic Roll Cart

Compact solutions for a wide range of narrow web splicing applications.

This manual roll-handling cart is designed to work with cantilevered roll changers, including Martin models STS Automatic Splicer, STR Automatic Turret Rewind, and MBEC Automatic Butt Splicer. An operator using this simple cart can pick up rolls and load them onto the unwind spindles, and unload finished rolls from the rewind for delivery to the next operation.

The cart is suitable for printing and converting as well as many packaging operations, with a powder coat finish and stainless steel arms.

TYPICAL SPECIFICATIONS

Maximum Roll Diameter	31.5 in	800 mm
Minimum Roll Diameter	16 in	410 mm
Maximum Roll Width	26 in	660 mm
Maximum Roll Weight	400 lbs	180 kg

UTILITY REQUIREMENTS

None
